1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a process of making a beverage, classified in class 426, subclass 597.
 - II. Claim 10, drawn to a beverage product, classified in class 426, subclass 597.
 - III. Claims 11-21, drawn to a brewing system, classified in class 99, subclass 323.3.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product may be made by a process wherein the tea extract and solvent are combined prior to heating or wherein the tea extract is heated by the solvent as they are combined.
3. Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus may be used for mixing/heating non-edible

material. The process may be practiced by an apparatus wherein the mixing conduit is also the heating chamber for the beverage extract.

4. Inventions III and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case In this case, the apparatus may be used for mixing/heating non-edible material to create a non-edible chemical product. The product may be prepared by an apparatus wherein the mixing conduit is also the heating chamber for the beverage extract.

5. Because these inventions are distinct for the reasons given above and the search strategy required for any one Group is not required for any other Group, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Weier whose telephone number is 703-308-3846. The examiner can normally be reached on Monday-Friday.
